O/Ref.No. 17/01-16 dt. December 19, 2014

It has been a pleasure to work with OCLanguage for over 3 years. We implemented this software solution for conducting maximum control over translation agency business management. It has been a perfect choice of using OCLanguage to separate large projects into many subprojects or tasks for vendors. The number of tasks is unlimited, which allows us to tailor the project workflow management steps to the specifics of every order we handle. At the same time we benefit from unique features, that one can never find in many-sided systems. Just to share some of them: translators rating, language pairs and translation areas statistics, interpreting services management and many more.

In 2014 we received major update of the system functionality. We bear fruit from the outstanding service and care that developers of OCLanguage are willing to provide every time we apply for assistance. During daily cooperation, we recognize added value, when every of our inquiries is sorted out in short terms and with impressive professional knowledge and competencies.
